

# Acceptance Test Code for Water Cooling Towers

## Contents

	Page		Page
<b>I. Test Procedure</b>			
1. Scope and Purpose .....	1	7. Natural-Draft Cooling Towers - Performance Curve Method .....	11
1.1 Scope .....	1	7.1 Scope and Purpose .....	11
1.2 Purpose .....	1	7.2 Manufacturer's Data .....	11
1.3 Flexibility .....	1	7.3 Determination of Tower Capability .....	11
1.4 Other Uses .....	1	8. Natural-Draft Cooling Towers with Fan-Assist - Performance Curve Method .....	12
1.5 Impartial Testing Service .....	1	8.1 Scope and Purpose .....	12
1.6 System of Units .....	1	8.2 Manufacturer's Data .....	12
1.7 Uncertainty Analysis .....	1	8.3 Determination of Tower Capability .....	12
1.8 Nomenclature .....	1	9. Wet/Dry Mechanical-Draft Cooling Towers - Performance Curve Method .....	12
2. Conditions of Test .....	3	9.1 Scope and Purpose .....	12
2.1 Conduct of Test .....	3	9.2 Manufacturer's Data .....	12
2.2 Condition of Equipment .....	3	9.3 Determination of Tower Capability .....	13
2.3 Operating Conditions .....	3	<b>III. Appendices</b>	
2.4 Constancy of Test Conditions .....	4	A. SI Example Mechanical-Draft Cooling Tower Characteristic Curve Method .....	14
2.5 Duration of Test .....	4	B. IP Example Mechanical-Draft Cooling Tower - Characteristic Curve Method .....	17
2.6 Frequency of Readings .....	4	C. SI Example Mechanical-Draft Cooling Tower - Performance Curve Method .....	20
2.7 Test Uncertainty .....	5	D. IP Example Mechanical-Draft Cooling Tower - Performance Curve Method .....	25
3. Instruments and Measurements .....	5	E. SI Example Natural-Draft Cooling Tower - Performance Curve Method .....	30
3.1 Water Flow Measurements .....	5	F. IP Example Natural-Draft Cooling Tower - Performance Curve Method .....	38
3.2 Water Temperature Measurements .....	5	G. Number and Location of Wet-Bulb Temperature Measurement Stations .....	46
3.3 Inlet Air temperature Measurements .....	6	H. Psychrometrics .....	48
3.4 Wind Velocity (Speed and Direction) .....	7	I. Correcting Cold Water Temperature for Heat Added by Pump .....	64
3.5 Tower Pumping Head .....	7	J. Adjusting Measured Data for Thermal Lag .....	66
3.6 Fan Driver Power .....	8	K. References .....	67
3.7 Water Analysis .....	8	L. Determining Wind Velocity on Natural Draft Cooling Towers .....	68
4. Report of Results .....	8	M. Expressing Tower Capability as a Function of Deviation from Design Cold Water Temperature .....	69
4.1 Scope .....	8	N. Sample Test Forms .....	71
4.2 Test forms .....	8		
4.3 Distribution .....	8		
4.4 Security .....	8		
4.5 Limitations .....	8		
4.6 Tower Capability .....	9		
<b>II. Evaluation of Results</b>			
5. Mechanical-Draft Cooling Towers - . Characteristic Curve Method .....	10		
5.1 Scope and Purpose .....	10		
5.2 Manufacturer's Data .....	10		
5.3 Determination of Test L/G Value .....	10		
5.4 Determination of Test KAV/L Value .....	10		
5.5 Determination of Tower Capability .....	10		
6. Mechanical-Draft Cooling Towers - ..... Performance Curve Method .....	11		
6.1 Scope and Purpose .....	11		
6.2 Manufacturer's Data .....	11		
6.3 Determination of Tower Capability .....	11
